

Tutorial 3

- **Write MPI program to print hello from each process in the comm world**
- **Write MPI program to do point-to-point communication:**
 - Master process: send msg with tag 1134
 - Master process: wait for msg with tag 4114
 - Slave process: receive msg with tag 1134
 - Slave process: send back msg with tag 4114
- **Write MPI program for sending and receiving**
 - Process 1 sends 4 characters to process 0
 - Process 0 receives an integer (4 bytes)
